

Special Collection for Rectory A/C

The air conditioning in the Rectory had been repaired repeatedly over the past three years, and this summer it finally gave out completely. We had to replace the condenser, the evaporator coil, and the copper tubing to circulate the refrigerant. The total cost was close to \$10,000. We will take up a special collection on the weekend of June 22-23 to defray part of this cost. If you wish to contribute, you can use either your monthly blue envelopes for maintenance or the envelopes in the church pews. Please label your checks and/or the envelopes with "Rectory A/C," so that these funds can be separated from the Sunday collection. You can drop them into the collection baskets at the same time as the regular Sunday collection.

Thank you for your generosity.
